DETAILED ACTION

Response to Amendment

1. The amendments to the claims, in the response submitted 4/10/09, are acknowledged and accepted.

Election/Restrictions

2. Claims 1-2, 6-20, 24-33 are allowable. Claims 3-5 and 21-23, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among species I-IV, as set forth in the Office action mailed on 6/26/08, is hereby withdrawn** and claims 3-5 and 21-23 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Schulte on 6/17/09.

The application has been amended as follows:

In the abstract, line 3 delete "is provided"

Claim 1, line 5 replace "the Bragg condition" with --a Bragg condition--

Claim 1, lines 5-6 replace "at least one of the wavelength" with --at least one of a wavelength--

Claim 1, line 7, replace "the interference fringes" with --interference fringes--

Claim 1, lines 7-8 replace "the reproduction position servo-control" with --a reproduction position servo-control--

Claim 13, lines 2-3 replace "wherein a reflected transmission beam of the reproduction beam reflected after transmitting the recording layer" with --wherein the servo beam is a reflected transmission beam of the reproduction beam reflected after transmitting the recording layer--

Claim 19, line 7, replace "the Bragg condition" with --a Bragg condition--

Claim 19, line 7, replace "at least one of the wavelength" with --at least one of a wavelength--

Claim 19, lines 8-9 replace "the interference fringes" with --interference fringes--

Claim 19, line 9 replace "the reproduction position servo-control" with --a reproduction position servo-control--

Claim 30, line 3, replace "forms the servo beams by splitting part of the reproduction beam" with --forms the servo beams by splitting part of the reproduction beam transmitting the recording layer--

Allowable Subject Matter

4. Claims 1-33 are allowed.
5. Claims 1 and 19 are allowable over the prior art of record for at least the reason that even though the prior art discloses a holographic memory reproduction apparatus and method in which a diffraction beam is generated in a recording layer of a holographic recording medium by projecting a reproduction beam onto interference fringes formed by projecting an object beam and a reference beam onto the recording layer to thereby reproduce information from the diffraction beam, the prior art fails to teach or reasonably suggest a servo beam which satisfies a Bragg condition while at least one of a wavelength incident angle, and incident direction thereof is different from that of the reproduction beam is projected onto interference fringes, whereby a reproduction position servo-control of the holographic recording medium is performed by means of the diffraction beam generated by the projection of the servo beam. Claims 2-18, 20-33 are dependent on claims 1 and 19 and are allowable for at least the same reasons claims 1 and 19 are allowable.
